SÁVIO MARIGUELA DECARO

Mobile Developer (Kotlin · Swift) | Full Stack

Ribeirão Preto, SP | +55 16 99350-8184 | savio.decaro@gmail.com | https://www.linkedin.com/in/savio-mariguela-decaro-1a06b1279/ | https://github.com/SavioDec | https://saviodecaro.dev

SUMMARY

Mobile Developer focused on Kotlin and Swift (Android and iOS) with a Full Stack background, currently studying Software Engineering. Experienced with REST APIs, C#/.NET, Next.js, TypeScript and PostgreSQL. At RDG Tecnologia em Automação, I maintain production systems used by the whole team, MQTT-based IoT integrations and SCADA systems for about 26 clients.

EXPERIENCE

Software Developer Intern | RDG Tecnologia em Automação

Ribeirão Preto, SP, Brazil | 02/2026 – Present

- Built and maintain in production a monorepo with 5 applications (Employee Portal, Scheduling, Finance, Work Orders and Inventory) using Next.js, TypeScript, NextAuth and PostgreSQL, used by all 8 employees, deployed with Docker and GitHub Actions CI/CD.
- Built the Time Tracking system with overtime bank, vacations, medical certificates and PDF timesheets, using Next.js, PostgreSQL and automated emails.
- Implemented QR code scanning and label OCR on mobile in the Inventory app (html5-qrcode and tesseract.js), and digital signatures with PDF generation in the Work Orders app.
- Build and maintain RDG Hub (Next.js, ssh2, PostgreSQL), with an IoT terminal dashboard, real-time logs, a TV wallboard, a browser-based SSH terminal and single sign-on (SSO) across systems.
- Build and maintain SCADA systems in Scada-LTS integrated with equipment via MQTT, serving about 26 of the company's clients.
- Created the web interface for the Sigflux mixer (Next.js, Prisma, PostgreSQL and MQTT): recipes, production queue, command dispatch and real-time equipment telemetry.

IT Intern | Câmara Municipal de Sertãozinho

Sertãozinho, SP, Brazil | 09/2025 – 02/2026

- Support and infrastructure: resolved hardware, software and network incidents for internal users.
- Internal development: maintained administrative systems and automated processes through programming.
- Security and operations: collaborated on information security protocols and system continuity.

EDUCATION

Bachelor's Degree in Software Engineering

UNAERP, Ribeirão Preto, SP, Brazil | In progress, 6th semester

SKILLS

Mobile: Kotlin, Swift, Android, macOS, iOS

Backend: C#/.NET, Node.js, Java (Spring Boot), Python, C, REST APIs, MQTT, NextAuth, ESP32

Frontend: TypeScript, JavaScript, Next.js, React, Angular, Tailwind CSS

Data and Cloud: PostgreSQL, SQL, SQLite, Prisma, Firebase (Firestore), Docker

Tools: Git, GitHub Actions (CI/CD), SSH (servers on AWS), Scada-LTS

PROJECTS

- **D.I.V.I. / IIoT Gateway (05/2026):** Vibration monitoring and industrial motor control via ESP32. C#/.NET gateway with an offline-first SQLite database syncing to Firebase (Firestore), and a Next.js and TypeScript dashboard with real-time data.
- **Keep It Up (Kotlin):** Android app built with Kotlin. github.com/SavioDec/Keep-It-Up
- **Toothless Mouse Follower (Swift, macOS):** Mouse-following mascot for macOS built with Swift. github.com/SavioDec/mouse_follower_banguela_MacOs

- **Todo List REST API (Java, Spring Boot):** To-do list with a REST API built with Java and Spring Boot. github.com/SavioDec/APIRestTodoList
- **ONG Fucinhos e Bigodes (Next.js):** Pet adoption web platform built with Next.js, TypeScript and Tailwind CSS. github.com/SavioDec/Ong-fucinhos-bigodes

COURSES

- JavaScript + TypeScript + Node.js – JavaScript Developer, Dener Troquatte (Udemy)
- JavaScript and TypeScript from Beginner to Advanced – Luiz Otávio Miranda and Tales Calogi Malaquias (Udemy)
- Web Development with JavaScript, TypeScript and Angular – Jorge Sant Ana (Udemy)
- C#: Basic Formation – Thaise Medeiros (LinkedIn Learning)
- .NET Developer from Zero to Professional with C# – Diogo Costa (Udemy)

LANGUAGES

- Portuguese: native
- English: advanced
