ABOUT ME

Passionate about technology and software development, I aim to apply my knowledge in JavaScript, TypeScript, Python, C# and C to create efficient and innovative solutions. I focus on continuous learning, process improvement, and delivering high-quality results.

PROFESSIONAL OBJECTIVES

- Work on technology and software development projects, exploring innovative methods and tools.
- Apply creative solutions to solve problems and optimize processes efficiently.
- Contribute to well-structured results with a focus on quality and continuous improvement.
- Continuously learn and evolve, adding value to the projects and teams I am involved in.

EDUCATION

Bachelor's Degree in Software Engineering – UNAERP, Ribeirão Preto, Brasil
Status: Currently enrolled – 3nd year (6th semester)

EXPERIENCE

Software Developer Intern - RDG Tecnologia em Automação Ribeirão Preto, SP

- Full Stack & Cloud: Development of Next.js dashboards with real-time data integration and deployment on AWS.
- Automation Systems: Modernization of SCADA systems and supervisory interfaces for legacy system integration.
- Database: PostgreSQL modeling and manipulation for the persistence and analysis of industrial data.
- Maintenance & Support: Software optimization for low latency and specialized technical support for automation tools.

IT Intern - Câmara Municipal de Sertãozinho Sertãozinho, SP

- Support & Infrastructure: Resolution of hardware, software, and network incidents for internal users.
- Internal Development: Maintenance of administrative systems and process automation through programming.
- Security & Operations: Collaboration on information security protocols and system continuity.
